Data on gender-(dis)aggregated homicides

Anna Alvazzi del Frate
UNODC/DPA/SASS
Report on the Meeting of the Friends of the Chair
Aguascalientes, Mexico, 9 – 11 December 2009

• Indicators that require further work:
  – Femicide and spousal homicide
  – Stalking
  – Recognizing violence as a crime
A feminist definition

• “The killing of females by males because they are female”*
  – Misogynist murders
  – Mutilation, rape, battery ending with the death of the victim
  – “Honour crimes"

D. Russell, 1976
Femicide: the gender-based murder of a woman

• “Femicide occurs everywhere, but the scale of some cases of femicide within community contexts — for example, in Ciudad Juárez, Mexico and Guatemala — has drawn attention to this aspect of violence against women. (...) Impunity for these crimes is seen as a key factor in these occurrences, and in the case of Guatemala, the legacy of the internal armed conflict that ended in 1996 is also seen as a contributing factor.”

In-depth study on all forms of violence against women,
Report of the Secretary General,
A/61/122/Add.1, 2006
Femicide as an indicator of VAW

• “...'femicide' or murder of women, which is the gravest form of violence against women. Although femicide is not captured by prevalence methodology, it constitutes one of the most accurate criminal justice statistics where such data is available.”

Statement by Prof. Yakın Ertürk
Special Rapporteur on violence against women, its causes and consequences

HUMAN RIGHTS COUNCIL
Seventh session, Geneva, 11 March 2008
Availability of data
Gender-based or gender statistics?

• Is it possible to identify when a crime is “gender-based” in statistics?

• Or is it only about the gender of the victim?
Women victims of homicide

- Many countries have data on homicide disaggregated by sex
- See for example WHO deaths by violence
- Breakdown by sex
- Interpersonal violence, women as victims
AUSTRALIA: Homicides by victims

Victimisation rate from 1989-90 to 2006-07, by sex (per 100,000 per year)

Source: AICNHMP 1989-90 to 2006-07 [computer file]
Gender-disaggregated data on homicides are generally unavailable

** South African Police Service statistics are given from April 2005 to March 2006.

Coverage of criminal justice data on homicide
## Homicide categories (10th UN-CTS)

- Murder (deliberate and unlawful killing a person)
- Manslaughter
- Infanticide
- Homicide related to:
  - Intimate/proximity
  - Family
  - Felony murder/Robbery/Assault leading to death
  - Fight
  - Sex
  - Drug
  - Alcohol
  - Arson
  - Gang/Organized Crime
  - Juvenile gang killings
  - Act of Terrorism
  - Professional negligence (medical, pharmaceutical, etc)
- Abortion
- Euthanasia
- Help with suicide
- Causing death by dangerous driving
- Causing death by careless driving (whilst under the influence of alcohol and drugs)

- 62 countries provided detailed information on at least some of these categories
- Data were not disaggregated by sex
Intentional homicide (11th UN-CTS)

POLICE STATISTICS

• COMPLETED Intentional Homicide:
  – offences at the national level
  – offences in the largest city
  – offences at the national level committed with firearm
  – persons (adults and juveniles) brought into formal contact with the police

• Total Intentional Homicide
  – offences at the national level
  – offences in the largest city
  – offences at the national level committed with firearm
  – persons (adults and juveniles) brought into formal contact with the police

• Number of persons killed at the national level

Data not disaggregated by sex
Intentional homicide (11th UN-CTS – ctd.)

PROSECUTION STATISTICS

- COMPLETED Intentional Homicide:
  - Persons (adults and juveniles) prosecuted
- Total Intentional Homicide:
  - Persons (adults and juveniles) prosecuted

COURT STATISTICS

- COMPLETED Intentional Homicide:
  - Persons (adults and juveniles) convicted
- Total Intentional Homicide:
  - Persons (adults and juveniles) convicted

The 12th UN-CTS will include breakdown by sex of victims and offenders
“Gender-based” homicide statistics

- Some countries have data on witchcraft killings
- Some countries have data on honour killings
- Data on spousal violence, sexual violence + breakdown by sex provide (maybe) a proxy for “gender-based” homicide
- Some countries have estimates of killings of baby girls
Possible “gender-based” categories of homicide which may appear in statistics

- Intimate/proximity homicide
- Homicide in the family
- Sexually-motivated homicide
- Forced abortion
- Infanticide
Thank you
